Parks & Recreation
Fairchild Park

Project	Fairchild Park – Shade Project	**Council District**	2
Location	1214 E Crockett St, 78202		
Project Background	The City of San Antonio is currently in Year 4 of a five-year Shade Program focused on increasing shade coverage at public playgrounds throughout San Antonio. The program is designed to enhance the comfort, safety, and usability of playgrounds by providing additional protection from the sun and extreme temperatures, allowing children and families to enjoy these recreational spaces more comfortably throughout the year. Fairchild Park was identified as a priority for Fiscal Year 2027. Upon review, the park needs significant improvements, including new playground equipment, updated safety surfacing, and improved lighting. These enhancements would provide a safer, more accessible, and more inviting recreational environment for children and families while supporting the City's commitment to providing quality parks and equitable access to recreational opportunities.		
Project Scope	4 post shade structures, new 5-12 playground, Integrated shade over disc swing, PIP surfacing, lighting improvements, and concrete slab and grading.
