Glass Options and Energy Efficiency

- HP^{SC}**

High Performance Solar Cooling HP^{SC} features specialty Low-E^{SC} glass with Argon gas sealed between the glass panes for increased insulation against temperature transfer. It deflects the sun’s heat and can greatly reduce heat gain, fade damage and cooling costs in warmer regions.
- HP**

High Performance glass with Low-E glass and Argon gas sealed between the glass panes provides increased energy efficiency in any climate, along with fade protection from the sun.
- Low-E^{SC}**

For homes in warmer regions, Low-E^{SC} glass deflects the sun’s heat to reduce heat gain, fade damage and cooling costs.

Did you know?

Ply Gem windows and patio doors can be configured to meet a specific ENERGY STAR® zone in all states.

Performance	500 Series Single Hung	500 Series Sliding Patio Door
Design Pressure (DP) Rating	50	+35/-40, 50 options
Texas Dept. of Insurance (TDI) Evaluation	WIN 435	DR 536

Peace of mind.
