RE: Residential Structure
1932 W Huisache Ave
San Antonio, TX 78201

DEMOLITION PLAN

HANSCO will demolish the one story residential structure, utilizing heavy hydraulic equipment. The demolition will start at the top of the structure and work down through the foundation. The debris will be generally segregated into three (3) types of materials. One is the trash, another is metals and the last is hard-fill (concrete/stone/and asphalt).

The trash will be loaded into haul trucks and taken, (following the best direct path), to Waste Management's Covel Gardens Landfill on Covel Road for disposal. The metals will be loaded into haul trucks and taken, (following the best direct path), to National Steel at 726 El Paso Street, for recycling. The hard-fill materials will be loaded into haul trucks and taken, (following the best direct path), to one of several permitted sites around San Antonio for recycling and or fill.

If you have any questions regarding this plan, please do not hesitate to contact me. I can be reached at (210) 527-7799 or Tyler@hanscodemo.com.

Sincerely,
Tyler Hans,
Project Manager/ Estimator
